Coco Peat / Coir Pith Block

Coir Pith is a spongy material which is procured from the process of taking out of coir fiber from coconut husk. It is known for its excellent soil conditioning properties and is therefore being extensively used as a soil-less medium for Horti, Flori & Agricultural purposes. Owing to its moisture retention qualities, this product is appropriate for growing vegetables, fruits, flowers & greens. We make it available in raw form or converted into organic, moisture by using biotechnology process, making it ideal for gardening and horticulture.

Coir / Coco Peat Mertis

- ☞ Less than 2 mm fine dust removed, maintain maximum expansion cores materials
- ☞ Free from weed, seeds and other microbial contamination
- ☞ Ideal Air / Water ratio when irrigated
- ☞ Stability over a long period & time
- ☞ 100% Natural land Non Hazardous
- ☞ Substitute for hand wood and Soft wood banks

Erosion Combo Coco / Coir Woven Geo - Textile

D-Tree Coco Erosion Control Coco / Coir Woven geo - textiles play vital role in preventing erosion by protecting lower phase and promote quick vegetation. D-Tree Coco Erosion Control Coco / Coir Woven geo-textiles are wonderful treasure of nature, eco friendly, erosion control blankets in woven and non-woven forms.

Erosion Control Coco / Coir Woven

It can be used in :
